1. Background story

Digital coins were all but non-existent until 2009 when Bitcoin first presented from seemingly nowhere. It also drove blockchain technology into focus, leading a true revolution into the digital world; People designed cryptocurrencies as a digital system to directly move information among members, through a completely decentralized network of computers or other mobile devices. Verifying the cryptographic information is considered as mining, and miners after finishing their work with receive a unit of coins. The system working flow is mainly based on verifying information included a block and adding such blocks to a chain of blocks (we can call it the blockchain). It is the core factor to ensure that information is distributed in a decentralized network. This also means that coins transfers take place instantly on a peer-to-peer principle - from one user to another - without the authority of any banks, financial central, card offering companies, or payment institution, etc.

2. Team Goal

At a very early stage, we have set our mission on developing GMC Coin into a globally recognized cryptocurrency. GMC Coin aims to be accepted by twenty of thousands of merchants - products and services supplier varying from regions to regions at an international level. It's our vision that GMC Coin will be supported by a fast-growing number of users. We are all taking great effort in significantly rocketing its price on open exchanges. Based on the decentralized nature of GMC Coin mining, we can hold all of the developmental work on the blockchain, the wallet and the explorer continuously under tight control. Users can be safely store GMC Coin in their wallets built for the cloud, Android, Linux and PC and transfer directly to any other ones instantly at virtually cost-free - without bank procedures.

3. What is GMC Coin ?

GMC Coin is an advanced cryptocurrency which could enable users to approach a simpler, safer and faster transaction method. People from all fields of business can take advantage of GMC Coin for their own sake. You can use GMC Coin, of course, to transfer money, to buy and sell goods and services from all corners of the world.

GMC Coin is a modern alternative using a X11 encryption that is not dependent on the current banking system and has its own value. There are 3.0 billion of GMC Coin available for user. Over 70 000 people are going to use this type of digital cash and most of them reside in Asia. Then, we are working to expand GMC Coin to worldwide users and do more research on how to increase our maximum block size in order to avoid future issues like hard forking of SegWit.

GMC Coin is a high-quality digital cash which is developed by R&G GmbH. Mining technology employs the X11 Proof-ofWork (POW). GMC Coin represent for our ambition of growing the foundation of a new, global digital cash-based economic system. Members of this system may earn, spend and trade GMC Coin for increasing benefit.

GMC Specification

- Coin Type: POW/POS HYBRID
- Algorithm: X11
- Name: GMC Coin

- Coin Abbreviation: GMC
- Maximum coin supply: 72,245,700
- Premine: 30,000,000
- POW block reward: 30 GMC
- Time between reward: 120 Seconds
- Minimum stake age: 30 days
- Maximum stake age: 90 days
- POS Yearly interest: 18%

4. Core Features

Lending

GMC lending is digital currency lending approach where a user can lend GMC for a certain period of time by agreeing on the loan contract. Upon expiration or termination of the stage, GMC will return cryptocurrency with monthly/annual % rate on top of it.

Staking

Staking is the process when you use your wallet to validate transactions and get awards with GMC. In staking period, your wallet is checking transactions to assure that everyone sending GMC actually owned those coins and have the right to transfer them. If almost of the wallets online agree that a transaction is valid, later it can be accepted by the network.

Trading

GMC trading is developed to make exchanges of coin built possible for counterparties using the GMC level of quality without the assistance of a centralized exchange. Users can create and cryptographically sign and share orders using a variety of off-chain communication practice and carry out the trades directly on the blockchain.

Mining

Mining is used a tool of work for users in the blockchain. Each participating node try to 'mine' the block (an algorithm that is in need of extraordinary CPU ability) after a block of transactions is to be approved. Then, your completed blockchain mining will be rewarded with an amount of GMC.

5. GMC Roadmap

We all know from where and when we go.

Each footprint in the roadmap illustrates our promises to make sure that everything would be finished completely at the committed time, so that we can successfully bring the GMC platforms to its members

for doing their business, their money transaction or investment. This roadmap would present to you the most user friendly way to use GMC Coin.

6. Our Program

6.1 GMC mining

Under the mining program, we can follow the 3 steps below to earn interest:

- Step 1: You can mine GMC with CPU/GPU
- Step 2: For mining GMC, download miner
- Step 3: Start mining GMC

With each block you mined you will get 40 GMC, you can decide to solo mining or pool mining, for more pool mining information, please reach us at website: gmceexchange.com

6.2 GMC Trading

- Step 1: Deposit BTC or ETH
- Step 2: Buying GMC
- Step 3: Trading, buying and selling GMC

Price fluctuation makes it possible for you to earn profit when trading, buying at low price and selling at better price.

6.3 GMC Staking

Follow 3 steps instructed below:

Step 1: Deposit BTC or ETH in GMC in [web]

Step 2: Buy GMC on GMC Exchange and download the Desktop Wallet

Step 3: Stake GMC

Hold you GMC minimum for 15 days to start earning Staking interest.

6.4 Lending program

Why GMC is your best investment ever?

GMC An advanced solution for global money transaction and payment.

Demand is always high and with our lending program, needs for GMC is rapidly on the rise, which allows a more opportunities for GMC price significant increase.

A strong community of GMC users and investors.

PR, marketing strategies are continuously improved to maximize GMC brand equity

The current price is fairly low compared to its potential growth in the short run

GMC Lending

- Step 1: Deposit BTC or ETH
- Step 2: Purchase GMC
- Step 3: Lend GMC

Lending Program guarantees your stable and regular profit despite any price fluctuation, monthly profit up to 45%, this is your great choice to achieve financial security.

We offer the Lending program as below:

START-UP

| Capital Pack | 6 Month |

7. Leading Team

We are a cross functional and full stack founding team led by successful entrepreneurs who built their companies from scratch.

Rusty Palmer

CEO

I have had a background in team leadership and I have worked many corporate jobs where I just didn't seem to fit in. The businesses I worked for always wanted to box me in as I was trying to build myself. Corporations only want you to be content with slightly better than minimum wages, and poor conditions... I have a passion for San Bernardino, arts and music, team building, leadership. I want to build here in San Bernardino a community of value and sharing and the truth is what

we really need to do is come together as a community and build together.

Erik Lemus

Executive Program Director

Carrick has been working in the corner of education and content development for more than ten years. His clients are mainly Customer Service and IT Enterprises. He has three years of experience in developing digital cash and related projects. Carrick had a great passion for his job and the ambition of building a world-class digital casAs Executive Program director, Erik has developed his career through serving unique community organizations. Erick received a B.A in Psychology from

California State University, San Bernardino in 2011. With the help of Community leaders and His extensive work in community development. Erik has lived in countries such as Mexico, Europe and Australia and has gained international stature in community development.

Cesar Gomez

COO

As the COO of "The Revolve Project", I have the vision, experience and network to make almost anything happen in order to make the project a success. The leadership that will be needed to help facilitate all of the different areas that we will be managing is something I'm sure I will be able to provide. The success of the project will depend on how well we work together in teams and how well we can solve problems. Having an open mind and knowing that anything is possible

is the spirit of the business. I hope that this can also be mirrored in the community and with student involvement.

Michael Diaz

Executive Marketing Director

Michael Diaz graduated from California State University, San Bernardino with a Bachelor's Degree in Advertising Management in December of 2012. Despite his major focusing exclusively on advertising, Michael has the better part of a decade's experience in graphic design, photo manipulation, video editing, audio editing, social media management and web design. He applies his skills to where it's needed in his ever growing effort to make the world a little better than

it was the day before.

David Smit

Software Engineer

David earned a B.S in Computer Engineering at Cal State University, San Bernardino.(CSUSB) He has worked on several projects while a student at CSUSB. He was part of a team that created automated tests for a circuit board vital to the safety of proton therapy. David continued to executed and recorded tests on cancer treatment software. In addition, he designed and built a Bluetooth controlled vehicle. I am currently a Junior Applications Engineer at Taiwan

Semiconductors auto ID Technology America.

Thank for your belief and interest on us!
